

ENTRE/MATIC

Normstahl Side Sectional Doors.

A perfect match.

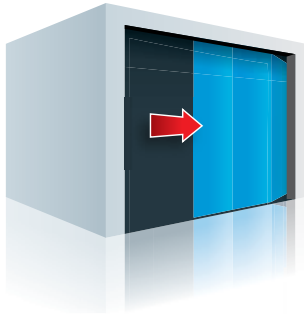

www.normstahl.com

THE DOOR TO THE WORLD IS ALSO THE DOOR TO YOUR HOME.

The perfect match for you and your house.
No matter what type of person you are.

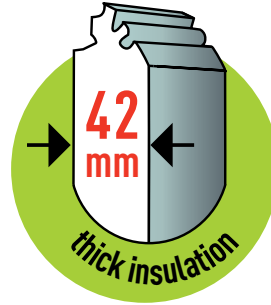

Whether you live in a cottage or townhouse, a half-timbered building or a farmhouse, a bungalow or a chalet: your house is stylish – and the right Side Sectional Door can highlight this. At Normstahl Entrematic you'll find the very door to reinforce the overall impression made by your home. An attractive prospect for you and your surroundings.

Optimum & free inset door function

As quick and easy as it gets! Open the door as far as you need and no further. The partial opening function of the Normstahl Side Sectional Door makes it possible: **it's a gate and a door rolled into one.** There are no other door elements that disrupt the appearance of your garage – a convenient aspect that looks good.

Our sustainability

Energy-efficient building or renovation: Side Sectional Doors from Normstahl are all made of panels with a thickness of 42 mm. This is how we guarantee efficient insulation. That's easy on the environment as well as your wallet!

Our reliability

We know what we're selling you. That's why we offer a 10-year factory warranty on absolutely all door components, including wearing parts like rollers, springs, hinges and the door surface. You can rely on this!

Our quality standard

We don't tolerate non-compliance. Normstahl Side Sectional Doors already offer premium quality in serial production. With our name we vouch for this – and will continue to do so in future.

Our tradition

For over 60 years Normstahl has stood for quality, sustainability, individuality, security, safety and reliability in relation to Normstahl Side Sectional Doors and operators. If you opt for a door from Normstahl, you're making the right choice!

Your individuality

Countless options for variation guarantee you'll find the very door for you! Choose your door according to your technical requirements and style preferences.

- Complete with free door function
- Designer applications possible

Clever product benefits.

Your overview.

[01] Tandem running gears mounted on ball bearings ensure optimum running. No squeaking, no jerky movements, just smooth raising and lowering at the push of a button.

[02] The stainless steel floor topping rail ensures that the door runs easily and reliably.

[03] The perfect guide rail for renovations. Thanks to its low installation height (15 mm), it can be installed directly on the finished floor. This removes the need for any time-consuming bracing work. The low rail height does not present any obstacle when driving in or out.

[04] Normstahl Side Sectional Doors are dry all the way around thanks to their optimum seals at all relevant points, such as the end casings, inlet side, rail runner and guide rail.

Colours and handles. **Your choice.**

Black metal

Stainless steel

Brass gilt

Silver

Ergonomic handles

Comfort, functionality, reliability - it's all in your hands. It is so easy to open and close the door. For the Side Sectional Door, the choice between a black metal or silver handle is included as standard. Stainless steel and brass gilt are also optionally available.

Take your time in selecting the right colour for your house.

Of course you do always have the chance to choose from a RAL-colour if you don't like one of the selected standard colours with finished surface.

Standard colours in finished surface*

Traffic white (based on RAL 9016)**	Light grey (based on RAL 7035)	White aluminium (based on RAL 9006)	Signal grey (based on RAL 7004)	Grey aluminium (based on RAL 9007)	Anthracite grey (based on RAL 7016)	Metallic grey (based on DB 703)	Light oak 060	Dark oak 070	Mahogany 080
Window grey (based on RAL 7040)	Slate grey (based on RAL 7015)	Ruby red (based on RAL 3003)	Chocolate brown (based on RAL 8017)	Sepia brown (based on RAL 8014)	Clay brown (based on RAL 8003)	Ochre brown (based on RAL 8001)	Fir green (based on RAL 6009)	Moss green (based on RAL 6005)	Light ivory (based on RAL 1015)

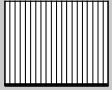

* Attention: Model Linea available in Traffic white (based on RAL 9016) only. Model Micro is not available in light oak 060 and dark oak 070, Models Flair, Micro and Classic not available in Mahogany 080. light oak 060 and dark oak 070 available in Brilliant-surface only.

** Basic shade available as standard for a lower price

Color variations through the printing process are possible!

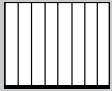

The models.

The right profile for your door.

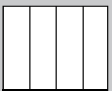

Linea model

The key to this design is the stylish bead. The even parallel lines running vertically over this door create a very appealing dynamic rhythm. Harmony for the eye – all down the line.

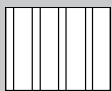

Trend model

An understated, low-key door that still sets a trend. The Trend model blends in perfectly with virtually every house thanks to its look of simple elegance. Here less is simply more.

Style model

Strength from tranquillity. The soothing lines of the Style model create a look of simple elegance. Pure aesthetic appeal.

Flair model

Familiar in its unfamiliarity: the distinctive beading in the side panel area offers a pleasant surprise at second glance. This model is familiar yet different, which is probably why it is so popular.

Micro model

Micro surprises with its delightful abundance of design elements. Depending on the perspective and angle of light this door offers a wealth of detail. A real eye catcher!

The windows. For a clear view.

Windows are important design elements.

For many years now, Normstahl Side Sectional Doors have been enhanced by attractive glass inserts.

Scratch-resistant clear or satined double-glazed acrylic glass – in any design – is guaranteed to give your drive a touch of exclusivity and individuality.

STYLE

On request, we can fit the side entrance door for your Side Sectional Door with practical and attractive motif glazings. They bring light into the garage and add an attractive visual touch.

The window frame matches the door colour or can be painted in a decor surface finish.

* With the standard colours Grey metallic, based on DB 703, Grey aluminium, based on RAL 9007, Light oak 060, Dark oak 070 and Mahogany 080, there is generally a difference in colour between the wet-painted light surround/motif window and the foil-coated panel surface.

Normstahl door operators.

Your powerful optional extra.

Door operators: Normstahl Magic 600 and Normstahl Magic 1000

The power of the Magic 600 is sufficient for many door sizes. With larger doors and for anyone who wants extra power we recommend the Magic 1000 door operator.

All-inclusive door operators

The package of every Normstahl door operator model includes everything you need for maximum comfort and optimum quality of life – safety functions, emergency unlocking, compatibility with Homelink or bus systems, remote transmitter, wall bracket, etc.

What our operators have to offer:

- Including remote transmitter 4-command Mini and 2-command Micro 433 Rolling Code
- Max. running speed: 210 mm/s (idle)
- Menu guidance by display
- Compact, rotating head of operator
- Maintenance-free toothed belt
- Robust design with C-rail
- Low current consumption
- Bus system-capable (with additional circuit board)
- Automatic obstacle detection
- Soft start and adjustable, gentle soft-stop function
- Partial opening system (with Magic 1000)
